Projects with no tasks	3
Projects that have up to 10 tasks valid for all configurations and for which we can run tests and generate routes	9
Projects with no valid tasks	6
Total	18

Observation 1: 'Cucumber & coverage tasks' means tasks that have the gem 'cucumber-rails' installed as well as a gem for test coverage (Simplecov or Coveralls). However, some of these tasks do not have implemented Cucumber tests.

Observation 2: We do not analyze all tasks per project, but only the necessary to reach the goal of selecting 10 tasks.

Observation 3: 'Selected tasks' means tasks that are valid for all Testl configurations and tasks for which we can run tests and generate Rails routes.
